

HAGAB®

Inspection pipe extension for BASIC 4

Basic 4 with inspection pipe extension

Basic 4 with IRIS and inspection pipe extension

The inspection pipe extension is used when you want to cover BASIC and the ducts with insulation, or with loose wool insulation.

Easy installation
Easy access
Cost-effective

PRODUCT

The inspection pipe is a sleeve/nipple pipe fitted with an insulated cleaning cover and bayonet tracks to fit directly on BASIC 4. The cleaning cover is held in place by clips that fasten against the inside of the inspection pipe. The cleaning cover is removed by turning and pulling. The cover has either one or two handles.

MATERIAL

The cover is made of galvanized steel plate and insulated internally with rock wool. The inspection pipe is made of galvanized steel with an EPDM rubber gasket.

EXAMPLE DESCRIPTION

QJC.12 (acc. to AMA VVS & Kyl 16)

Non-return damper, HAGAB type BASIC 4 in size 160 fitted with an inspection pipe extension for external insulation.

Inspection pipe extension for BASIC 4
