

HAGAB®

Inspection pipe extension for BASIC 4

Basic 4 with inspection pipe extension

The inspection pipe extension is used when you want to cover BASIC and the ducts with insulation, or with loose wool insulation.

Easy installation
Easy access
Cost-effective

PRODUCT

The inspection pipe is a sleeve/nipple pipe fitted with bayonet tracks to fit directly on BASIC 4. The cleaning cover on Basic 4 is removed by turning and pulling.

MATERIAL

The inspection pipe is made of galvanized steel with an EPDM rubber gasket.

EXEMPLE DESCRIPTION

QJC.12 (acc. to AMA VVS & Kyl 22)

Non-return damper, HAGAB type BASIC 4 in size 160 fitted with an inspection pipe extension for external insulation.

Inspection pipe extension for BASIC 4
